gpd Branded Compressors are Pre-Filled with Oil

All gpd 65 series compressors are pre-filled with the correct amount of oil specified for the system. Vehicles with rear air may require more oil. Always refer to the manufacturer's specifications.

Take note of a blue or yellow tag stating the amount and viscosity of the oil inside of the compressor.

Features & Benefits

- 100% Leak tested with helium spectrometers
- 200,000 mile durability test on every new compressor design
- All 65 series compressors pre-filled with oil
- All 65 series compressors are produced under TSI6949 certification guidelines and meet or exceed OE standards

Compressors Kits

gpd Compressor Kits Include:

- Compressor
- Accumulator/Drier
- Expansion Device
- O-Ring Rapid Seal Kit (Unless otherwise noted)
- Rear Expansion Device (If equipped)

As a solution for under performing and commonly replaced scroll and rotary vane style compressors, gpd designed a line of select piston replacement compressors. gpd's piston replacement compressors are a direct bolt-on, bolt-off replacement. Original scroll and rotary vane style replacements are also available. Visit gpdtechtips.com for more info.
